Summary

Machine Learning Engineer pursuing an M.S. in Engineering Artificial Intelligence at Carnegie Mellon University Africa. Proficient in developing and deploying deep learning models using PyTorch, Transformers, scikit-learn, and Agentic AI with N8N, LangChain, AutoGPT, AutoGen. Demonstrated expertise in NLP (fine-tuned BERT achieving 90.7% accuracy) and Computer Vision (CNN architectures). Collaborative team player with strong communication skills and a detail-oriented approach to problem-solving. Recent research applies ML surrogates to solar PV system design in West Africa.

Education

2025–2027	Carnegie Mellon University Africa, Kigali, Rwanda Master of Science in Engineering Artificial Intelligence
2017–2022	Federal University of Technology Akure, Akure, Nigeria Bachelor of Engineering in Agricultural & Environmental Engineering (First Class Honours)

Professional Experience

	Research Assistant – Carnegie Mellon University Africa DEAL Lab, Kigali, Rwanda Built a PV performance modeling pipeline (PyTorch + pvlib) for West African solar systems; validated NASA POWER, ERA5, MERRA-2 irradiance against 23-station WAPP ground data ($R^2 = 0.974$)
Jun–Aug 2026	- Decomposed a 59% PV performance gap; soiling and storage account for ~24 pp combined, residual ~35 pp flagged for further work - Authored 8 weekly reflections, 12 slide decks, and an annotated bibliography of 23 peer-reviewed papers on African solar PV modeling
	Graduate Teaching Assistant (Data Analytics) – Carnegie Mellon University Africa, Kigali, Rwanda
Jan–Apr 2026	Supported course delivery through tutorials, grading, and office hours; provided guidance on data analysis workflows and tooling
	Senior Data Analyst – Fluna, Lagos, Nigeria
2023–2025	- Drove 60% business growth in 18 months by designing data mining pipelines that expanded customer acquisition by 300+ companies, contributing to \$2M+ in annual revenue - Built customer databases using SQL and CRM platforms; created A/B testing campaigns increasing revenue by 30% YoY - Recipient of Impact Award, Team Player of the Year (2024), and Excellence Award (2025) for exceptional cross-functional collaboration
	Logistics Analyst Intern – TotalEnergies EP Nigeria Limited, Lagos, Nigeria
2022–2023	Conducted Environmental Impact Assessments at offshore logistics base; gained hands-on experience in Technical Logistics and Supply Chain Management

Skills & Certifications

Programming:	Python (Advanced), R (Intermediate), SQL (Advanced)
ML/DL (Advanced):	PyTorch, scikit-learn, Hugging Face Transformers (Intermediate): TensorFlow
Deep Learning:	CNNs (ResNet, VGG), Transformers (BERT), Transfer Learning, Fine-tuning
Data Science:	Pandas, NumPy, Matplotlib, Seaborn, SHAP, Statistical Analysis, pvlib
Tools:	Git, Jupyter, Linux
Languages:	English (Professional Working – ILR 3+) Igbo (Native – ILR 5)
Certifications:	AWS AI & ML Scholarship Google Data Analytics Professional Google Cloud AI/ML

Interests & Achievements

Awards:	Mastercard Foundation Scholar (CMU Africa, 2025) Federal Government Scholar (Nigeria, 2020–2023) Academic Excellence Award (NSE & NIAE)
Interests:	Open-source ML on GitHub • AI for Social Good • ML technical writing • Competitive Football
